**OUR PHILOSOPHY OF EDUCATION**

Our Center for Early Childhood Education opens a window on the world for each child through:

- The Joy of Music
- The Beauty of Art
- The Magic of Literature
- The Spontaneity of Dramatic Expression
- The Excitement of Scientific Discovery

These experiences enable children to grow to their maximum potential socially, emotionally, intellectually, and physically. As skills and interest develops, self-confidence grows. Children learn to work and play cooperatively with others. They learn to better understand and express their feelings. They develop body awareness through both small and large muscle activities. Symbolic play and art help children to move from the world of make-believe to the world of words in reading and writing.
